

Index V5 Embossers

Introduced at Sight City 2016

Basic-D

Reliable classic for fan-fold paper

- Compact size & light weight
- 100 characters per second
- Print from portable devices
- Braille & text labeled control panel
- Tractor-fed: most reliable paper feeding method

Basic-D is a portable and powerful Braille embosser for continuous fan-folded paper. Its extraordinary performance and very competitive price makes it the most sold braille embosser in the world.

The stable embosser can print Braille for hours without stopping. The tractor-fed design provides smooth paper handling and continuous Braille embossing.

The compact design of Basic-D fits any desktop. It is perfect for Braille printing in any form, right at your fingertips.

Acoustic hood for Basic-D. The Acoustic Hood reduces embossing noise to a pleasant office level. It suits Basic-D versions four and five.

The hood are table based, for home, school and office use where low noise levels are appreciated. The acoustic hood efficiently muffle the sound made when embossing high-quality braille. Even the cable holes have sound dampers, preventing any noise leakage.

Everest-D

Flexibility on cut-sheet paper

- 100 characters per second
- High resolution tactile graphics
- Print from portable devices
- Automatic booklet format printing
- Horizontal and vertical printing options

Everest-D supplies endless Braille opportunities on cut-sheet paper. The successful design has been refined for over 20 years. The result is an embosser that fits every need.

With the flexibility of the sheet-feeder, Everest-D can emboss Braille labels, booklets, and high resolution tactile graphics; and is even capable of embossing on thicker materials like cardboard or plastic.

Its unique sheet feeder gives stability on cut-sheet paper. Explore the opportunities of one of our most popular embossers. Create braille just the way you want it with Everest-D.

Acoustic hood for Everest-D. The Acoustic Hood reduces embossing noise to a pleasant office level. It suits Everest-D versions four and five. The hood are table based, for home, school and office use where low noise levels are appreciated. The acoustic hood efficiently muffle the sound made when embossing high-quality braille. Even the cable holes have sound dampers, preventing any noise leakage.

BrailleBox

High speed on cut-sheet paper

- 300 characters per second
- Automated (open/close) braille tray
- < 30% faster embossing speed than V4
- Emboss hassle-free Braille books (with automatic booklet format)
- Print from portable devices

BrailleBox is a high speed production Braille embosser for cut-sheet paper. Its excellent design makes it user friendly in every detail. The winner of several renowned design awards, BrailleBox is a successful embosser for the production market.

BrailleBox is the smallest and lightest embosser of its kind. Still, it embosses with superb precision at a very high speed. This makes it perfectly suited for large documents and Braille books.

The design award winning BrailleBox is easily operated by blind and sighted users alike. The automatic page organizing simplifies braille production into the easy booklet format. User friendly and beautifully designed, Braille Box is the only high-speed embosser you need.
