Welcome to the Tactile Reading conference in Stockholm 5–7 April – the most important international conference about braille and graphics for children and youth in 2017. The conference will bring together people working with children and youth with visual impairments and blindness, academics in various research areas, vendors and game changers.

This will be a great experience and opportunity to exchange knowledge with more than 200 delegates. The conference is arranged by the Swedish Agency for Accessible Media and the National Agency for Special Needs Education and Schools in Sweden.

Speakers
We offer more than 50 speakers, from various countries, who will present successful working methods and useful research results in the field of tactile reading.

Topics
• Development of tactual understanding
• Tactile reading and the brain
• Braille and literacy
• Tactile graphics
• Universal design and tactile reading

Registration
Read about what the conference has to offer you on our website and stay updated. New speakers will be presented in the next few weeks!

Visit our website for registration and more information: www.tactilereading.org #tactilereading17

We hope to see you in April!

Catarina Hägg Project manager, the National Agency for Special Needs Education and Schools

Björn Westling Research & development, the Swedish Agency for Accessible Media
