INDEX
BRAILLE

Making Braille

Mr Björn Löfstedt, CEO Index Braille AB

In my view, stability is possible only when looking forward. As I write this, Index Braille is launching a new company website and the new WinBraille 5. We have renovated our premises into a full scale Braille house, optimized to produce large quantities of embossers. Our paperless office makes us faster and better organized then ever. The catalogue you're reading is part of the concept. We won't deliver it. Instead, everyone can download and print it locally. Thus it will always be available, saving both time and trees.

I am proud of our new Braille editor. WinBraille 5 is completely rebuilt on Windows standards. If you know common text editors you'll easily use new WinBraille 5. Your embosser will produce Braille on the day of delivery. All you need is in the box. Please visit our website and download WinBraille 5 for free. Updates are always free of charge.

Since 1982 we have made Braille easier. The new website is a living part of our customer focus. It makes it easy to find what you need, when you need it. Quickly watch product presentations and videos or dig deeper for backgrounds and detailed specifications. The new Index Braille site will also act as a rich information link between us and our distributor network.

We focus on Braille. Checking the facts, you'll find that we're doing the right thing. Index Braille embossers have the best size performance and price performance on the market. We have lower service costs then all other brands. Our Braille quality exceeds the standards by far. Looking forward, we invest to keep it that way. Welcome to our world.

Easy

Braille has never been easier. Unpack, install and go. From Index Braille you'll receive systems, not only embossers. To perfect your Braille experience we always include the following with all embossers:

Ready to go. When you receive an Index Braille embosser, you can start embossing right away. Printer drivers, paper, cables and manuals are included in the shipping.

Free editor. WinBraille, our fully equipped Braille editor, is always included.

Free upgrades. WinBraille and firmware are easily upgraded from our website.

Connections Supports USB, Network, Centronics and Serial ports. Embossing is easily monitored on an internal web server.

For blind and sighted Index Braille embossers provide equal access. The keys are marked with Braille and the embosser communicates by speech in many languages.

Double sided embossing Using both sides of the paper saves the environment and your wallet.

Excellent dot quality Braille dot quality exceeds all international standards.

Tactile graphics Emboss high resolution pictures, maps and more.

2 year Warranty All our products come with a two year warranty.

The Company

We make Braille easy

Index Braille is the world leading Braille embosser producer. Experience is our key. We have developed Braille embossers for 27 years. Our focus is user-friendly, high quality Braille. You'll feel the difference.

Index Braille is based in northern Sweden, close to the Arctic Circle. We develop and produce Braille embossers. 97% of our embossers are exported around the globe.
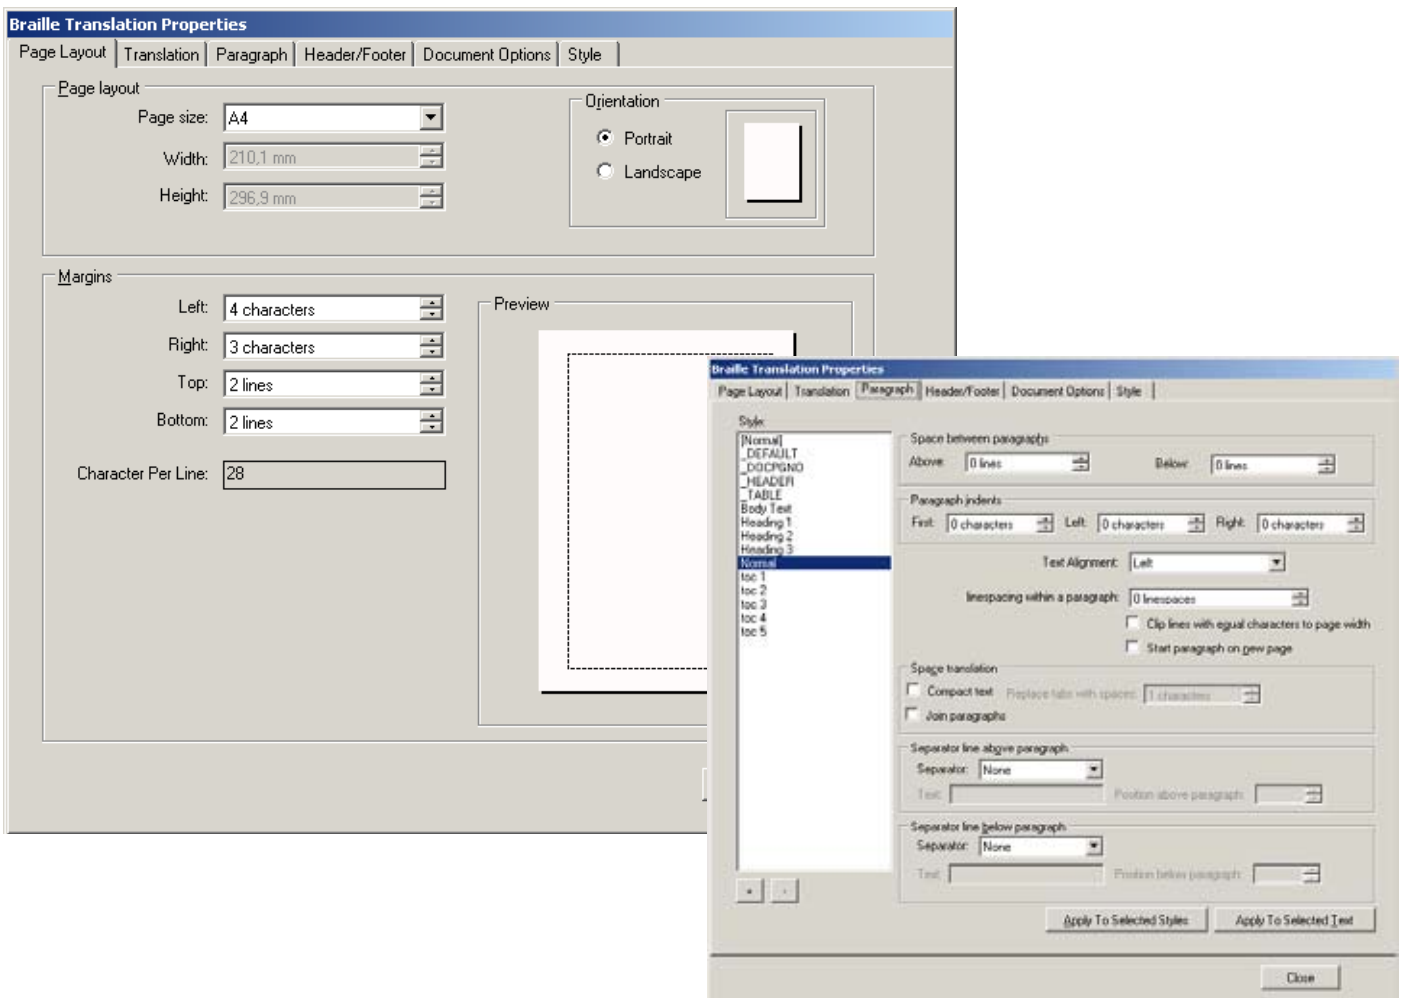

With 27 years in business we cover a third of the Braille embossing market. You are our focus. We'll try staying on top to give you the best Braille possible.

Module service is an Index Braille keyword. We quickly send spare parts and gladly receive the broken ones in return. You save time and money. We get the opportunity to correct mistakes. The exchange parts are easily put in place without prior Braille knowledge.
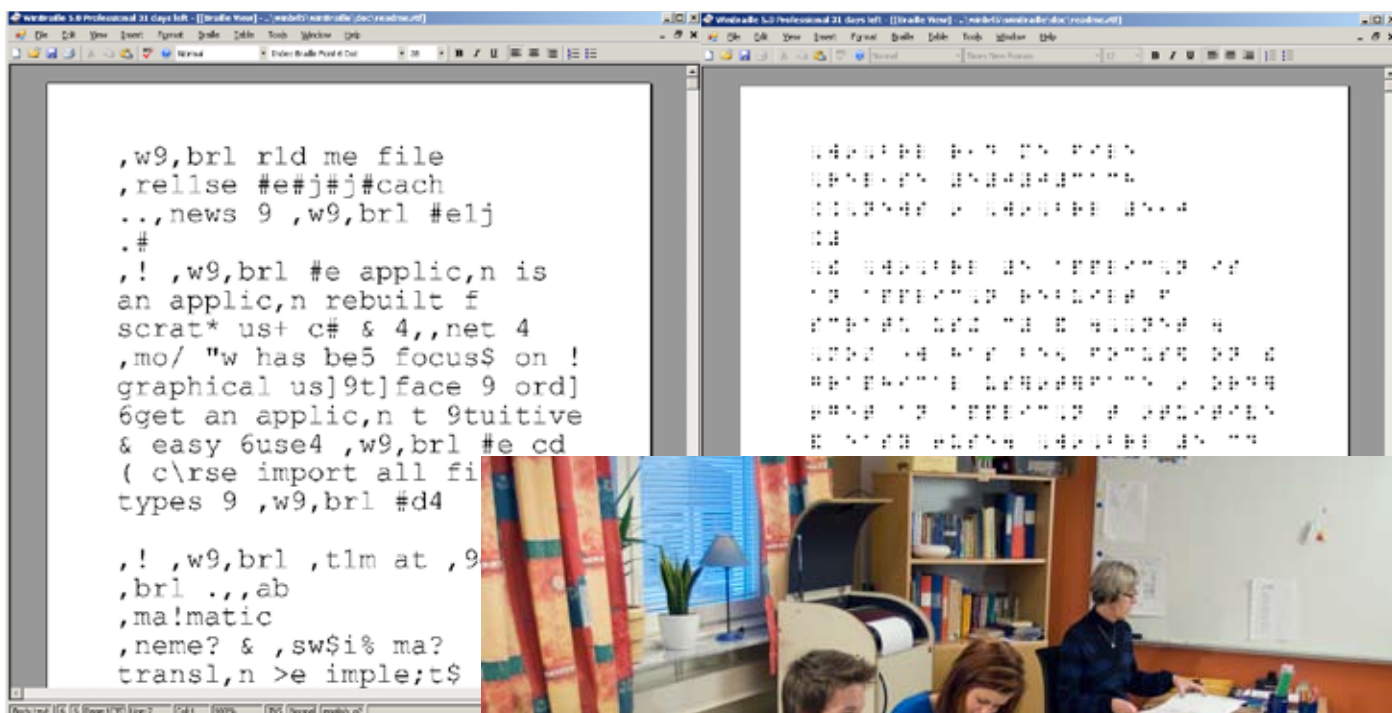

WinBraille

Free Braille Editor

Braille embossing requires a translating and formatting editor. WinBraille is free to download and upgrade. Produce Braille the easy way. WinBraille does it for you.

Introducing new WinBraille 5 – the user friendly Braille editor. WinBraille does the job. It translates, formats and automatically adjusts your text to the Braille embosser. WinBraille supports contracted and uncontracted Braille in more than 30 languages.

Download and upgrade for free!

• WinBraille Free, All basic features.
• WinBraille PRO, Advanced formatting choices.

Basic

World leader - fan folded paper

The most sold Braille embosser in the world. Basic-D is portable, fast and simple to use. Fan folded paper gives unbeatable stability.

Basic-D combines experience and creativity to form our most popular embosser. It offers stable, unmonitored embossing all day. Basic-D is a charming home embosser and an efficient office producer at the same time. "D" stands for double sided embossing, an Index Braille standard.

Tip) Labels are easily embossed on Basic-D. Please download the free software Braille Labeler from the Index Braille website to emboss your designs on plastic, paper or aluminium.

Everest

Braille anywhere - cut sheet paper

World leading flexibility. Everest uses cut sheet paper from your closest store. It handles different document sizes with equal ease. For the most flexible embossing, Everest is the answer.

Before Everest, embossers were limited to fan folded Braille paper. Everest is developed for cut sheet paper of all kinds. Thus it works everywhere. Everest is an inexpensive, highly developed solution for easy information sharing.

Tip) Braille business cards is a must-have. Everest is your tool, specialized in flexible document sizes and ink and Braille in the same document. Please download the Braille Labeler software from www.indexbraille.com

4X4 PRO

Magazine producer - cut sheet paper

Newspaper production made easy. 4X4 PRO gives you complete books and magazines from cut sheet paper. The system offers full flexibility at low producing costs.

4X4 PRO is a Braille magazine embosser for mass production. 4X4 PRO presents complete magazines automatically sorted, stacked and ready for binding.

Cut sheet paper keep production costs down. It boosts flexibility and information sharing where fan folded paper is hard to find.

*Tip) Use several 4X4 PROs for efficient mass production at low costs.*

4Waves PRO

Professional Braille embossing - fan folded paper

Large scale, around the clock Braille embossing is here. With 4Waves PRO your production won't stop. It offers user friendly, high speed Braille embossing. The multi printer design facilitates service and use.

4Waves PRO is ready to emboss 24 hours a day. 4Waves PRO consists of four individual embossing modules. They simultaneously emboss 1 000 pages per hour. 4Waves PRO automatically adjusts to any number of inserted modules.

For high speed, high quality production without halts. One service module is included with 4Waves PRO. If one of the modules should need maintenance, it is easily replaced with the service module. The exchange takes a few minutes and does not require any tools.

Tip) Illustrate with tactile graphics. 4Waves PRO can emboss pictures anywhere in your document. Please download WinBraille from www.indexbraille.com to start creating, editing and embossing graphics.

Silent embossing. Top quality Braille embossing makes noise. Our acoustic accessories reduce the sound of Braille embossing to a pleasant office level. They collect and store large amounts of paper and efficiently cool the embosser.

Acoustic Cabinet Basic
Free standing cabinet for large scale production. Acoustic cabinet stores and collects large amounts of paper. A fan cools the embosser, offering non-stop production.

Acoustic Hood Basic
Small, table placed hood for home or office. Suits small scale embossing.

Acoustic Cabinet 4X4 PRO
Free standing cabinet for large scale production with 4X4 PRO or Everest. Acoustic cabinet cools the embosser, stores and collects large amounts of paper.

Acoustic Hood Everest
Table placed hood for small scale embossing. Quiet embossing at home or in the office.

Index Braille Stapler
Emboss, staple and fold. It's simple to make Braille books. Index Braille stapler is perfected for magazines from 4X4 PRO.
